Press Release

OPEN LABS RELEASES STAGELIGHT 1.1 UPDATE

The Easy Way To Create Music – JUST GOT EASIER!

Austin, TX. – June 26, 2013 - Open Labs, LLC. (www.openlabs.com), today announced StageLight 1.1, a significant update to the groundbreaking music app. StageLight 1.1 adds all-new features and enhancements that expand the app's core creation capabilities, performance and overall functionality - *making it even easier for you to create music.* StageLight 1.1 is FREE for all registered owners and is available for download by simply launching the app and selecting the UPDATE option.

"StageLight 1.1 is more than just an update, it's a collaborative effort of creative minds working together to achieve something special," said Cliff Mountain, owner and CEO. "StageLight 1.1 proudly emerges after months of hard work from our team – employees, customers and partners. As a result, we are now a major step closer to achieving our goal of providing people of any skill level or financial situation the tools and training necessary to create their own music."

As a testament, StageLight 1.1 introduces the all-new Linkin Park-inspired SongBuilder™ which quickly and easily navigates you through the music creation process. "If music is the subject, SongBuilder is the teacher," explains Mountain. SongBuilder was originally designed to empower people musically through a series of simple step-by-step progressions. For this version of SongBuilder, we worked closely with our partners Linkin Park, whom are strong supporters of music education. This update to SongBuilder is not just for beginners, 1.1 now has intermediate lessons for those graduating from beginner status to aspiring artist.

StageLight 1.1 also includes a brand new integrated drum machine, which makes creating drum beats fast, simple and most importantly, fun. The new drum machine was inspired and developed with multi-platinum producer Timbaland. You now have the choice of creating beats using a traditional step sequencer or with StageLight's new touch-screen-ready, velocity sensitive drum pads. You can easily enhance and customize your drums sounds by simply adding a variety of included or 3rd party effects and plug-ins to each individual drum track as well as import prerecorded loops and samples.

If you haven't already purchased StageLight, these and other amazing features can all be yours for only $9.99/USD. You can download a 30-day FREE trial or the full version of StageLight 1.1 here: www.openlabs.com. Today, StageLight 1.1 is available for PCs that have Windows 7 or Windows 8, a minimum of 4 GB of RAM and at least an i3 processor or equivalent. StageLight is available in English and in simplified Chinese. For more information on StageLight 1.1 updates, a video can be found here: http://youtu.be/TdZ2UEUmMRk.
